Visionary Readers

GENERAL DESCRIPTION: All Visionary Readers come equipped standard with a solid state CCD camera for a dependable clear image. A reversal option, black letter on white background or white letters on black background. An easy sliding view table (14" x 14") which features front to back friction brakes and side to side margin stops. User friendly controls allow you to select magnification size. All Visionary Readers have a 2 year 100% parts & labor warranty.

OUR FEATURE PRODUCT: Our most popular reader, the 14" Visionary, is the most versatile reader available today. With the ability to grow with your needs, the 14" Visionary will continue to give you reading enjoyment for years to come. As your vision changes, the reader can change with your needs. All you need to do is change the screen to a 19" or 25". With the larger screen, magnification is increased, up to 60 times. Side by side viewing is also an option if you prefer.

**VISIONARY OPTIONS:**

Line Marking/Windowing: "Windowing" allows for blackout of all text except the line you're reading. "Line Marking" underlines the line reading. *Not available on the 25" systems.*

Select-A-Color Option: 24 selectable screen colors on the color models and 22 on the black & white models. Combinations include: *yellow on blue*amber on black*green on black*. *Not available on the 25" systems.*

SmartVideo Foot Pedal: Allows you to use your computer's monitor with the Visionary Camera. Easy controls enable you to switch from PC viewing to magnified text viewing from your camera.

Screen Reading Software

Cicero Text Reader for Windows 95/98 and Windows 2000/NT 4.0

Introduction Cicero can convert a computer with a scanner into a reading machine. By placing the printed text on the scanner, Cicero can translate the text to speech.

Cicero...

- Is quickly and easily installed.
- Is very easy to use.
- Reads letters in total privacy
- Requires little user training.

Features include:

- Single key operation.
- No need to worry about paper orientation on the scanner.
- Recognizes text automatically.
- Works on all Windows 95/98 platforms.
- Converts scanned text into any word processor
- System Integration
- Dolphin's Suite of Windows products combine to form an integrated work environment for Windows 95/98 or Windows NT 4.0, allowing you to perform your computer -based tasks more quickly and productively.

The suite includes:

- Supernova Reader Magnifier
- Hal Screen Reader
- Lunar Screen Enlarger
- LunarPlus Enhanced Screen Enlarger
- Cicero Text Reader
- Cipher Braille Translator
- Orpheus Software Speech System
- With Cicero you get: Free lifetime technical support
- Upgrades at a fixed cost (An upgrade is a major product development, e.g.upgrading from version 1 to 2).
- Discounts when trading in a Windows screen reader Cicero provides the highest level of independence at the lowest total cost. Ease of use and automation make time consuming configuration and training redundant. Cicero is available for single users, multi-user sites, and networks, spanning the complete range of PC computing environments.

Cicero for Windows 95/98ME, NT AND 2000	Single License	\$345.00
	Additional License	\$140.00

	Upgrades	\$160.00

MAGic 8.0 Screen Magnification Software with Low Vision Speech

MAGic 8.0 Screen Magnification with Speech combines state-of-the-art magnification features with a true low vision speech option. The software magnifies the information the person chooses, from two times to 16 times its normal size. The smoothing feature eliminates jagged edges caused by bit mapping when images or characters are magnified on the screen.

With the speech option, MAGic 8.0 gives users the ability to choose information they want read from a computer screen as they navigate applications. MAGic reads the information aloud as users type it-either character-by-character or word-by-word, or they can move the mouse over existing text and hear it. The speech option is particularly helpful when listening to entire paragraphs, email or lengthy documents on the Internet. Speech can be used in conjunction with the magnification or independently.

The easy to understand user color-coded interface, and hot keys that avoid conflicts with Windows® and other software applications highlight MAGic's list of other features, including:

- Easy to understand Talking/Large Print installation to get started quickly.
- Four configurable magnification views to display information.
- Enhancements to easily locate and follow the mouse.
- Cursor and mouse tracking to keep the point of focus in view.
- Tether Mouse to Display brings the mouse into view whenever it is moved.
- Screen locators give a visual reference on an unmagnified screen and then allows for quick movement to a new location.
- Inverse Colors feature improves contrast and ease of reading.
- Quick panning to review documents.
- A version of MAGic 8.0 without the speech option is available.
- MAGic 8.0 comes with: One Program CD-ROM and printed User's Manual.

Purchasing the MAGic Software Maintenance Agreement (SMA) along with your new MAGic product ensures that you receive the next two consecutive software upgrades as soon as they become available. The SMA can only be purchased occurrent shipping versions of MAGic.

Timed Evaluation

The timed evaluation offers you the freedom to evaluate MAGic Screen magnification Software on your system, in your environment. Available for windows 95/98/ME versions, it ships as the full product, complete with all manuals and documentation. The difference: it will cease to operate 60consecutive days after the initial installation date. If you decide to purchase the full version, the price of the timed evaluation will be deducted from your fully licensed version purchase price.

MegaDots

MegaDots is a word processing program that knows the rules for Braille. At the touch of a key, you can translate an entire document from print to Braille or from Braille to print. As you type either ink print or Braille material into MegaDots, you get to see what the ink print or Braille page will look like without any delay. At any point, you can make an ink print copy or a Braille copy. MegaDots is loaded with "transcriber-friendly" features to make it easier to produce your document in Braille. Skilled Braillists can do data entry directly in Braille, using six keys on the PC's keyboard as an electronic Braillewriter. It's also possible to print the Braille text as Braille dot patterns on the computer screen. This allows skilled Braillists to read Braille in a familiar way, and lets new users learn more about Braille. MegaDots can also translate many other word processor files such as WordPerfect.

MegaDots, Braille Translation software	\$540.00

WYNN (WHAT YOU NEED NOW)

If you find reading a chore, you'll appreciate WYNN û What You Need Now. WYNN transforms printed text into understandable text. Its easy-to-use color coded tool bars let you modify the appearance of the page to suit your individual needs, using your strengths to strengthen your weaknesses.

WYNN assists in reading and comprehension by spotlighting each word as it reads it aloud. This bimodal approach simultaneous visual and auditory input improves comprehension for many people.

Words run together? WYNN can change the spacing between words, lines, or even characters. Having trouble following from word to word? WYNN can mask out distracting sections of the page or change the color of the cursor. Prefer just the visual input? WYNN's voice can easily be shut off.

WYNN uses traditional study tools to help with comprehension and retention. You can highlight important passages, insert bookmarks, and add written or spoken notes. You can also use WYNN's Highlighted Lists feature to make personal study lists from your highlighted words.

WYNN has a host of writing features, including Spell Checking and Find & Replace. Students can scan in a worksheet, write the answers using WYNN, then give the completed worksheet back to the teacher. And teachers can use WYNN's Lockout feature to temporarily restrict access to the Dictionary, Thesaurus, and spell Checker during tests.

If you have difficulty reading
If you want to read more efficiently, effectively, and easily
If you want to be a reading winner
WYNN is What You Need Now!

WYNN's Exact View maintains the layout and graphics of the original document. Users can switch between Exact View and Text View, which strips away all but the text.

Using WYNN's Visual Presentation tools, you can customize the appearance of the text by increasing the spacing between words and lines, and modifying the text size, font, margins, and colors. Many people find that increasing the spacing between words and lines reduces visual bleed, in which words seem to bleed together, and helps with tracking problems.

WYNN'S built-in Dictionary and Thesaurus allow students to look up word definitions and synonyms. Bookmarks, highlighting, and other study tools help students focus on relevant material.

Choose between 5 and 9 copies of any combination of WYNN Wizard and WYNN Reader for your organization. Each copy of WYNN Wizard and WYNN Reader ships with the WYNN software on CD-ROM, print documentation, and a microphone.

To qualify for a multiple user license, an organization or institution is purchasing WYNN for use within a building, campus, district or state. Each multiple user license includes: one copy of the WYNN software on CD-ROM, one copy of print documentation, and microphones for the total number of installs on the license. Additional copies of the CD-ROM and documentation for a paid license are available at an additional charge at the time of original purchase.

Create your own combination of WYNN Wizard and WYNN Reader for 10 or more users. Prices listed are per install within a multiple user license.

Windows Eyes

Window-Eyes(TM) is a screen access program for Windows 9x and ME. Window-Eyes allows a blind or visually impaired person access to Windows and Windows applications. Window-Eyes includes a free copy of the Microsoft text-to-speech. If you are using Windows 9X and have a compatible sound card this speech is an excellent alternative to expensive dedicated voice synthesizers.

Most Windows applications work well with little or no configuration. Pre-configurations for major applications come standard with each copy of Window-Eyes. The GW Micro web page offers an extensive list of configurations for a broad range of applications and is constantly growing. If, however, you need to configure Window-Eyes, you will find it an easy process. There is no need to learn a complicated scripting language.

Some of the features Window-Eyes offers are as follows:

- Microsoft text-to-speech is included free of charge.
- Simple self talking CD install. If you have a compatible sound card the installation will speak.
- Full Microsoft Active Accessibility (MSAA) support. MSAA is being used more and more. GW Micro is committed to supporting this latest technology.
- Unsurpassed support for the Internet. Even the most visually complicated web pages can be read with ease using Microsoft's Internet Explorer.
- Extremely flexible and configurable without learning complicated scripting languages.
- Support all video systems.
- Full keyboard mouse support including pointer identification. The physical mouse can read the information passes over which is great far people with low vision.
- Automatically labels graphics with tool tips.
- Offers extensive information for standard Windows controls such as tree views, list views, etc. Even non-standard controls can easily be reclassified to mirror standard controls.
- Window-Eyes has been optimized for speed. You will find no screen reader more responsive than Window-Eyes.
- Extensive documentation in print, recorded on audio cassette, electronic form in ASCII text files and Windows help system.
- Also included is a three hour tutorial cassette tape.

Braille 'n Speak 2000

Innovation In Action Since 1987 the Braille & Speak has been the overwhelming choice of note-taker and personal organizer for blind and visually impaired children and adults around the world. Now in its third generation, Braille & Speak 2000 weighs well under one pound and is about the size of a video cassette & so you can take Braille & Speak 2000 with you anywhere. With 25-30 hours of battery life, its always ready to go whenever and wherever you are.

This original talking note-taker offers you the exciting combination of speech access and a standard Perkins style, Braille keyboard. Braille & Speak 2000 holds over 2.5mb of memory, so you can store more than 2,500 pages of Braille information!

The built-in speech synthesizer lets you input and edit directly into the memory of the Braille & Speak 2000 and instantly read the information back at the press of a single command. In combination with peripherals like our disk drive accessory, you'll also use Braille & Speak 2000 to read information you've imported from other computers, floppy disks, or the Internet.

A six-key input mode lets you input information in either grade I or grade II Braille, whichever you prefer.

Braille & Speak 2000 Features and Benefits:

- Portable & slightly more than 1 pound and nearly indestructible.
- Bilingual option & Operates two different languages if desired. Choose from among 15 languages, and switch between them at the touch of a key!
- Easy to operate & Simple, proven command structure. Both children and adults master the key features in no time at all.
- Word processing & Complete capabilities, including a complete spell checker.
- Speech synthesizer & Fully adjustable to allow you to control parameters such as tone, rate, pitch, and volume.
- Grade 2 Braille translation & Create documents in grade II Braille and have them automatically spoken and printed in fully translated and formatted text.

- External software & Our large selection of inexpensive note-taker software lets you add capabilities like personal money management, scientific graphing, and spreadsheet production to your Braille & Speak 2000.
- Time and Date functions & Talking clock, appointment calendar, alarm and stopwatch. Plus, a phone book organizer and scientific calculator.
- Accessories & Protective carrying case, easy-to-follow documentation and interface cables are all included. Self-service & Install software updates yourself, quickly and easily.
- Warranty: A full one-year warranty against manufacturing defects from date of receipt.
- Size: 8" x 5" x 1-1/4"
- Weight: About 1 pound
- Power: A nickel-cadmium battery that will power unit for 25-30 hours between charges. Also runs on standard household current via AC adaptor.
- Service Contract: Available, renewable annually.
- Accessories: Soft simulated leather case; battery charger/AC adaptor; earphone; serial cable; interface kit including Twiddle Dump; manual in print and audio cassette; Braille quick-reference guide; and Braille manual.
- Major Features: Braille 'n' Speak has a six-key Perkins-style keyboard.

Braille Lite 2000

Portability and versatility are the keys to the Braille Lite 2000. The 18 character refreshable Braille display allows you to read information quickly anywhere you travel. The lightweight design includes many heavyweight features not found in any portable note-taker on the market. The Braille Lite 2000 has the same 6-key Braille keyboard found on the Braille 'n Speak as well as a fully adjustable speech synthesizer. Combine the Braille 2000 with popular screen access programs such as JAWS for Windows & #8482; to provide quick Braille access to computers.

The first refreshable Braille Personal Data Assistant! Braille 2000 Features and Benefits:

- Major Features: Braille Lite 2000 has a six-key Perkins-style keyboard and an 18-cell, 8-dot re-freshable Braille display. Braille Lite's "view in grade two" mode allows you to load a text file of any kind and read it on your Braille display, in grade two Braille.
- Portable- Weighs only 3 pounds.
- Reliable- The rechargeable battery provides for up to 30 hours of use between charges. The quick recharge time is only 3 hours.
- Built in Software- Word processor, date book, phonebook, scientific calculator clock, stopwatch and spell checker are all included.
- Read in Grade 2 Braille- Built in Braille translation software instantly converts text into Grade 2 Braille.
- Connectivity- Serial and Parallel ports allow for easy connection to printers, embossers, and computers.
- External Software- A varied collection of useful productivity software is available to increase the capabilities of the Braille Lite 2000.
- Easy to Update- Convenient software upgrades make it easy to keep the Braille Lite 2000 current.
- Accessories- Carrying case, manuals, and cable are included.
- Options- Useful options such a portable disk drive and cables are available.
- Warranty- Comes with a 30-day money back guarantee of satisfaction. It also carries a 1 year warranty against manufacturing defects.
- Size: 8-1/4" x 5" x 1-3/4"
- Weight: About 3 pounds
- Power: A nickel-cadmium battery that will power unit for 25-30 hours between charges. Also runs on standard household current via AC adaptor.

Type Lite

Talking Note-taker with refreshable Braille. Type Lite is about the size of a textbook and weighs about 3lbs. Combine this easy portability with a 30+ hours battery life, and you'll want to take Type Lite everywhere you go. This talking note-taker offers you the exciting combination of speech access, refreshable Braille and a standard QWERTY keyboard. Type Lite is our roomiest note-taker yet. It holds over 16Mb of memory, so you can store more than 16,000 pages of Braille information! The big 40-cell Braille display allows you to read and edit what you've written directly into your Type Lites file memory. In combination with peripherals like our disk drive accessory, you'll also use the Braille display to read information you've imported to your Type Lite from other computers, floppy disks, or the Internet. Together with a screen access program like JAWS for Windows, Type Lite becomes a dynamic Braille display for your PC. Toggle easily between note-taker and PC modes at the flip of a switch. A six-key input mode lets you choose between Perkins-style or standard-keyboard entry.

**Type Lite Features and Benefits:**

- Major Features: Type Lite enjoys all the features of the Series 2000 Note-Takers
- Bilingual option & Operates two different languages if desired. Choose from among 15 languages, and switch between them at the touch of a key!
- Easy to operate & Simple, proven command structure. Both children and adults master it quickly.

Braille Blazer Embosser

Forget any preconceived notions about big, loud or immobile Braille embossers. The 12 lb. Braille Blazer is different! This combination of portability and unique engineering is so advanced, maybe we should have named it the Trailblazer.

YOU GET "TWO FOR THE MONEY"

When you purchase a Blazer, you actually get two machines in one. First, of course, you get a dependable, carry-along Braille embosser that handles paper up to 8-1/2" wide, in any length. It does an excellent job on regular computer paper, Braille paper, and even on smaller items such as tractor-fed index cards and labels. Secondly, the Blazer functions well as a speech synthesizer for use with any desktop or portable computer. Just combine your favorite screen access and Braille translation software with the Blazer...and that quick, you've got a very capable speech system. The result? A very capable speech system to see you through almost any workday situation. The Blazer's built-in synthesized speech keeps the configuration of your embosser a quick and simple process. You can even instruct the Blazer to print "sideways" for spreadsheets and screen dumps. You'll easily produce crisp, clear Braille graphics using the Blazer and a software program such as ETgraphX. Using the Graph-it program, you can produce mathematical graphs, too! Three Material Weights to Match Your Needs Select among three embossing modes: Light paper mode gives you quality Braille on standard paper. It's the choice you'll make for lists, proofreading, memos, and other "throwaway" applications. Regular mode is for Braille paper. Plastics mode was developed for the production of Braille signs and labels on lightweight polymer materials. The Braille Blazer accommodates many sizes of paper and plastics. It is extremely versatile, because we know your needs and applications probably change from day to day. The economical Braille Blazer may be the only embosser you will ever need. It was built with your budget in mind.

Major Features:

- Synthesized speech output;
- Prints on lightweight paper, Braille paper, and plastics from 1" to 8-1/2" wide;
- Prints 15 cps in 6 or 8 dot Braille;
- Prints spreadsheets;
- Extremely lightweight, compact, and portable;
- Carrying case available
- Size: 13-1/2" x 8" x 5" (with lid closed)
- Weight: About 12 pounds
- Power: Standard household current
- Warranty: One year from date of receipt
- Service Contract: Available, renewable annually.
- Accessories: Print manual; audio cassette tutorial

Service Contract: per year, renewable annually.		\$250.00

External Disk Drive

Provides unlimited data storage on 3-1/2" disks Think of the disk drive as a "data transfer station." It lets you save any file from your Blazie Note-Taker onto an ordinary diskette. Your disk will be formatted in standard PC compatible files, and can now be read by any IBM-compatible PC. You can transfer data for storage or sharing. Or, just back up file memory on your Braille 'n Speak, Type 'n Speak, Braille Lite, Braille Lite 40, or Type Lite. The disk drive will import data to your Note-Taker, too. So, you can hear in synthesized speech any text file stored on a PC disk If your Note-Taker has a Braille display, using the disk drive accessory is a great way to read computerized books, product manuals, and more. The disk drive is about the size and weight of a Braille 'n Speak, so it travels very well.

You'll be up and working with your disk drive in no time. No previous computer experience is necessary. Just plug the drive into your Blazie Note-Taker. It has its own set of friendly, easy-to-use commands within your Braille 'n Speak, Type 'n Speak, Braille Lite, or Type Lite. Long Battery Life: Those who like to work during commutes, sitting outdoors, or while otherwise "unplugged" will love the enhanced battery system. You will be able to work for 15 hours between charges. Works well with other serial devices: An optional cable lets you run the disk drive from any serial device. For example, if you have a VersaBraille, the disk drive will be an asset to you, too. Another optional cable is made especially for use with The Reading Edge. Telecommunications: You can use any telecommunications program on your PC, such as PROCOMM or TELIX, to send files to the disk drive accessory. ASCII files are simple to transfer, too.

Please indicate specific unit that disk drive will be connected to. Each Disk Drive comes with one cable that must match your specific unit.

***PowerBraille 80***

For Maximum power With PowerBraille 80s 80+1 cells, highly formatted material (such as columnar text or spreadsheets) is readily accessible. A split screen capability lets you configure two 40-cell windows, and the "+1" cell acts as a separator for extra convenience. For accurate, reliable, socially graceful access to computer screen, there's nothing like a PowerBraille! For more than 15 years, blind computer users have found that re-freshable Braille is a terrific way to interact with a dynamic computer screen. These slim, portable displays instantly transform screen data into 6-dot or 8-dot re-freshable Braille. If you use DOS, Windows, OS/2, or UNIX, PowerBraille will work for you! A variety of windows-based screen readers are available including Jaws, Window Bridge, Outspoken, and Window-Eyes.

PowerBraille Features and Benefits:

- Major Features: PowerBrailles are compatible with Windows, DOS, OS/2, and UNIX operating systems
- Instant cursor routing- Move the cursor to any character on the Braille display at the touch of a finger.
- Ergonomic controls- Thumb-controlled rocker bars let you roam the screen and read text at the same time, and allow independent movement of the display and cursor. More controls select split screen, and other display attributes, for your total convenience.
- Software compatibility- PB displays are supported by more access packages than any other Braille display in the world. Thus, speech output and re-freshable Braille are complimentary and fully integrated. More benefits- All models feature on-line Grade 2 Braille translation, state-of-the-art Braille cell technology, one parallel and two serial interfaces, and a printer pass-through port.
- Warranty: A 30-month warranty against manufacturing defects from date of receipt.
- Size: 24" x 11-1/2" x 1-1/2"
- Weight: 10 pounds
- Power: Standard household current or optional batteries
- Service Contract: Available, renewable annually.
- Accessories: Serial cable; parallel cable; print, disk, and Braille manuals; keyboard extender

- **Major Features:** PowerBrailles are compatible with Windows, DOS, OS/2, and UNIX operating systems
- **Instant cursor routing-** Move the cursor to any character on the Braille display at the touch of a finger.
- **Ergonomic controls-** Thumb-controlled rocker bars let you roam the screen and read text at the same time, and allow independent movement of the display and cursor. More controls select split screen, and other display attributes, for your total convenience.
- **Software compatibility-** PB displays are supported by more access packages than any other Braille display in the world. Thus, speech output and re-freshable Braille are complimentary and fully integrated.
- **More benefits-** All models feature on-line Grade 2 Braille translation, state-of-the-art Braille cell technology, one parallel and two serial interfaces, and a printer pass-through port.
- **Warranty:** A 30-month warranty against manufacturing defects from date of receipt.
- **Size:** 12" x 11-1/2" x 1-1/2"
- **Weight:** 5 pounds
- **Power:** Rechargeable batteries
- **Service Contract:** Available, renewable annually.
- **Accessories:** Serial cable; parallel cable; print, disk, and Braille manuals

The Blazer Inferno Braille Embosser

This newly engineered, wide carriage, high-quality Braille embosser is portable, dependable and fast working. Based on the widely used Blazer, the Inferno has some notable design expansions to offer users more versatility, greater capacity, and overall lowered operational Braille costs.

Features of the Blazer Inferno are:

- Wider carriage allows the use of Braille paper up to 11-inches wide, or Standard Braille Paper size, making it an easy choice for transcribers.
- BLAZING embossing speeds of 50 characters per second, or more.
- New Spool and Copy functions allow for embossing of large files of up to 60 Braille pages, and a repeat of up to 255 copies, without tying up the file source device.
- Light weight- 17.5 pounds.
- Size: 18" x 8" x 5"
- Power-up announcement of platen as "Text Mode," "Graphics Mode," or "Platen Error." This decreases embossing errors and paper waste.
- On the fly switching from parallel to serial port. The unit will announce current mode, eliminating the previously required start menu visit to make this change.
- An attractive new design of polished aluminum sides and a bright red, translucent cover.
- Emboss the current state of each menu item setting through a new keystroke command; especially helpful to deaf-blind users.
- New Printer Configuration menu settings of 1/8-inch increments for Page Length, offering more accuracy when embossing cards and labels.
- Carrying case available.
- Renewable, annual Product Maintenance Agreement (PMA) Available

The Blazer Inferno Braille Embosser	\$2,780.00
Product Maintenance Agreement, per year PMA	\$275.00
renewable annually	

***VersaPoint Duo Interpoint Embosser***

VersaPoint Duo Interpoint Embosser with Speech. When it comes to Braille embossers, the VersaPoint Duo makes a great impression! It is the only Braille embosser to combine renowned reliability with high speed, two-sided printing and reduced noise levels. The unequaled VersaPoint Duo from Blazie Engineering will shift your productivity into high gear. Built-in speech makes the Duo convenient and more fun to use. Customize the voice to your liking, and then use it to set (or Review) embossing configurations quickly and accurately. VersaPoint Duo will read text files directly from your computer, and play WAV files, too. The VersaPoint Duos crisp, consistent dot quality, and low-maintenance dependability result in highly readable, beautifully embossed documents. Its speech capabilities let you easily set configurations and check settings. Save time and paper with two-sided embossing. The VersaPoint Duo doubles the data contained on each sheet of paper by producing sharp Braille characters on both sides. You'll reduce paper usage without any tradeoff in quality! The VersaPoint Duo accepts paper in weights ranging from 20 lb. To 100 lb. The Duo is preset to produce interpoint Braille on tractor-fed paper. You may also choose the single-sheet, friction-feed option for easy, one-sided embossing on letterhead or personal stationery. Produce Brailled documents quickly and efficiently. The speedy VersaPoint Duo prints 6- or 8-dot Braille and tactile graphics at 60 characters per second, in interpoint mode, across its 40-character line length. Switch to single-side embossing mode at the touch of a button without any configuration changes! Let the durability and versatility of the Duo work to your advantage. It is perfectly suited to the regular use that occurs in schools, offices, and other settings that require the production of Brailled documents for several individuals.

VersaPoint Duo Features and Benefits:

- Preset Configuration-VersaPoint Duo is shipped ready to run. It contains preset serial and parallel modes to print from PCs, Macintoshes, Blazie Engineering note-takers and more. Of course all predefined settings are completely changeable.
- Easy-to-use keypad- Key in direct commands instead of using the more time-consuming menu functions. VersaPoint Duo gives tactile and audio feedback on settings.
- Fully DoubleTalk-compatible- If your screen reader supports DoubleTalk LT, the VersaPoint Duo can be your external synthesizer in both DOS and Windows.
- Hear WAV files- The VersaPoint Duos built-in speech plays WAV files, a popular format for creating, storing and editing sounds on computers.
-

- Escape sequences- Combine graphics and text on the same page, print sideways, or print multiple copies when you use these special codes.
- Print preview- You may advance paper beyond the VersaPoint Duos cover to proofread your document. Make sure the formatting is exactly right before you print the whole job!
- Multiple copies- You can automatically reproduce up to 99 copies, while your host computer remains free.
- Spreadsheets and ledgers- Without breaking format, the VP Duo will automatically send columns onto subsequent pages. The Duo can adjust to manage 80 and 160 character columns. Numbers won't get mixed up; documents will retain their original layouts.
- Computer Braille Tables- The VersaPoint Duo comes with eight built-in Braille character sets- and, if you wish, you can also create your own.
- Warranty: A one-year warranty against manufacturing defects from date of receipt.
- Size: 24" x 11-1/2" x 1-1/2"
- Weight: 12 pounds
- Power: Standard household A/C
- Service Contract: Available for \$550.00 per year, renewable annually.
- Accessories: Serial cable; parallel cable; print, disk, and Braille manuals; keyboard extender

Dectalk PC		\$995.00

***Double Talk LT:***

Double Talk LT is an inexpensive external voice synthesizer with high quality speech. 9 volt battery not included. It includes a power supply. It is small (5 1/4" x 3 3/4" x 1 2/2") and light weight. (less than one pound.) Double Talk LT has its own built-in speaker.

Double Talk PC	DTP	\$299.00
Double Talk LT	DTL	\$320.00
Double Talk for Apple (Internal)	DTA	\$255.00

Software***Connect Outloud Web Access Software***

Connect Outloud is an easy to use web access tool for blind or visually impaired computer users. It offers speech and Braille output to the web using Internet Explorer 5.5. Send and receive email using Outlook Express and also create documents in your easy to use FS Editor word processor with its own spell checker that is included. Connect Outloud works with the Windows® Desktop, Windows Explorer and many other applications and accessories including Windows Media player and Real Player.

Connect Outloud has an interactive talking install that allows you to get started without sighted assistance, and its Tutor Mode helps you learn its easy to use features via the keyboard. Connect Outloud is an ideal way to start learning and using a computer. The beginner to experienced computer user enjoys the freedom of the software's simple interface with no complicated configurations to learn or menus to navigate. Connect Outloud also comes with a comprehensive On Line Help System which provides easy to read details and keystrokes.

Dectalk PC Internal Synthesizer	DTN	\$995.00
Connect Outloud Web Access Software:		\$339.00

Software for Braille Notetakers***Graph-it***

Are you a teacher, parent, or student in search of a graphing calculator that can output graphs to a Braille embosser? Try Graph-it, the tactile scientific graphing calculator program for Blazie Engineering Note-Takers or IBM compatible PCs. Run Graph-it, type in an equation, and with just one command emboss a clear and accurate tactile image of the graph on almost any embosser. A different command plays an audio representation of the graph through the speaker for a quick, rough sound picture of the graph.

Graph-it		\$49.00
----------	--	---------

***Braille Calc***

Braille Calc adds the power of a spreadsheet calculator to your Note-Taker. Use Braille Calc to create organized tables of information, and if your data is numeric, use the cell referencing and automatic cell recalculation powers in Braille Calc to analyze your data.

Braille Calc \$49.00

V-Term

If you plan to go on line with your Blazie Engineering Note-Taker, then plan to buy V-Term. V-Term provides full VT-100 terminal emulations for your Note-Taker. This is vital for going on line and using popular programs like Pine for E-mail and Lynx for web surfing. The Internet is a great way to look up information and keep up with friends and family, and your Blazie Engineering Note-Taker can take you there.

V-Term \$49.00

Developer's Kit

Are you an experienced computer programmer using the C language program? Would you like to possess the software tools necessary for writing external programs for Blazie Note-Takers

If you answered yes to both questions, then our Developer's Kit may be what you've been searching for. The Developer's Kit does not teach you how to program, but if you already have C programming skills, you can use the Developer's Kit to write an enormous variety of programs for the Blazie Engineering Note-Takers. With it, serious programmers have at their fingertips everything they need to create executable program files. The Developer's Kit includes the following: The C compiler program complete documentation a complete library of specialized function as a disk of sample programs Windows IDE (Integrated Development Environment) for editing and compiling one or more C files into a BNS program

Developer's Kit \$320.00

Braille-Term Program

Braille-Term is a feature-rich telecommunications program for your Blazie Engineering Note-Taker. Going on the Internet? Braille-Term makes it easy with a dialing directory and automatic re-dialing. Braille-Term is easy to use and offers context sensitive help so help is always just a keystroke away.

Braille-Term Program \$99.00

Checkbook Manager

Simplify your financial life using your Blazie Engineering Note-Taker with Checkbook Manager. Record checks, deposits, ATM withdrawals, bank fees, and even accrued interest are all in one place. Checkbook Manager gives you the option of using your printer to write checks, automatically updating your account as you do. Best of all, your money management system goes everywhere your Note-Taker goes. Take charge of your banking today. Try Checkbook!

Checkbook Manager \$49.00

DancingDots

Dancing Dots Braille Music technology, L.P. GOODFEEL™ transcribe Braille music quickly, automatically, and accurately.

Are you a blind singer or instrumentalist who needs to have Braille scores quickly? Are you an educator or rehabilitation professional who serves blind musicians? GOODFEEL™ can help you. GOODFEEL™ automatically converts several kinds of computer music files to Braille. To transcribe these files with GOODFEEL™, you do not need to know how to read Braille music! Braille a single part, selected parts, or an entire score in seconds! GOODFEEL™ is a 32-bit Windows application that transcribes lyrics with improved support for non-English Braille. Includes the Lime notation editor and may be used with Cakewalk, MIDISCAN, and other music software.

How does it all work? Scan the print score (optional step) Use a notation editor or sequencer to prepare the score or sequence proofread or audition your piece emboss Braille notation and save to text file using GOODFEEL™ (no page limit)

"A powerful tool in the cause for music literacy for blind students and those who educate them." - Richard Taesch, Southern California Conservatory of Music

Dancing Dots Braille Music \$795.00

ETgraphX

Turn images from your IBM-PC into tactile graphics. You might call ETgraphX a "graphics translation" program, because when you use it with DOS drawing software like PC Paintbrush (or a scanner), you'll be able to reproduce just about any image as a Braille graphic. it's simple to achieve terrific results with EtgraphX.

ETgraphX \$249.00

***Audiocalc-scientific calculator***

Invaluable for both students and professionals, Audiocalc performs 15 scientific functions and speaks keys as they are pressed. Some of its capabilities include number editing, trigonometry, and transcendental functions.

Dependable Audiocalc, which measures 3-1/2" x 5-1/2" x 1-1/4" and weighs about one pound, has a waterproof keyboard for extra durability. It uses rechargeable nickel-cadmium batteries or standard household current.

A rechargeable battery, AC adaptor, earphone, protective case, and documentation in print and on audiocassette come with your purchase.

Audiocalc-scientific calculator	A-CALC-E	\$659.00
---------------------------------	----------	----------

Blank Brailleable Labels

We love these handy labels! Use either on cassette tapes or computer disks. Made of durable, translucent Mylar plastic, each type comes fan-folded into a box of 250 labels.

LBL-C (for cassette tapes)	\$25.00
----------------------------	---------

LBL-D (for computer disks)	\$25.00
----------------------------	---------

Braille Paper

Here is the most popular-sized Braille paper in a nice economical sheet. It is suitable for either one-side or interpoint applications, and performs well with the Blazer and almost every embosser known. (We use it around the office ourselves).

A box contains about 1,000 sheets of sprocket-holed, fan-folded Braille paper.

BP-8.5 (8-1/2" x 11")	\$30.00
-----------------------	---------

BP-11.5 (11-1/2" x 11")	\$35.00
-------------------------	---------

TempTalk Clinical Thermometer

TempTalk, the talking clinical thermometer, measures internal body temperature from 89.6 F to 107.6 F. TempTalk will clearly state your reading four times, and show it on an LCD display.

TempTalk, which measures 4-7/8" x 2" x 3/8", works orally, rectally or under the arm. Automatic shut-off protects the long-lasting lithium batteries.

A sturdy protective case and clearly detailed instructions in print are included with your purchase.

TempTalk Clinical Thermometer ~ 12 Volt	\$25.00
---	---------

Victor

Designed to navigate complexly organized works, Victor allows reading of highly structured books, as well as simpler leisure books in an easy, more effective way.

Users can now navigate much faster and far more efficiently through reference works and scholastic texts. Consult the table of contents, jump straight from one section to another, or insert bookmarks for quick return to an interesting page or paragraph. These are only a few of the functions Victor is capable of. Victor allows direct access to desired information, increasing efficiency and saving time.

Victor also offers advantages for leisure readers. Most of the time, a single CD contains a whole book, so reading with Victor means fewer items to handle and keep track of than with the conventional format of books on cassette. The Digital Sound quality is also more pleasing. With Victor, the visually impaired community enters a new era of access to information.

Victor Book Reader \$495.00

Teach Braille

Tutorial Software

Sharpen your grade two Braille skills with a Blazie Engineering Note-Taker. Teach Braille supplies words for you to spell in grade two, then checks your work. If an error in contraction is detected, the program reveals the correct grade two Braille spelling.

Are you a Braille teacher? This program lets you create up to 150 original grade two lessons, with some samples included to get you started. Whether teacher or student, Teach Braille can add to the enjoyment of learning Braille. Let it help you meet your objectives - no matter which side of the desk you sit on.

Teach Braille \$20.00

Voice Mate Carry Case \$25.00

Atlas-GPS

Atlas is a talking digital map consisting of most addresses and street intersections, nationwide, with a specially designed user interface to navigate and describe this map data verbally using right left, front back, the clock face, compass or 360 degree headings. Arrow keys are used to navigate around the map while a speech synthesizer announces as much or little information as the user wants to hear.

Atlas conveys far more than print or tactile maps, such as:

- The length of each block in imperial or metric units
- The heading and distance to a way point or destination
- Points of interest sorted by proximity or alphabetically
- Each block and turn of a route from your current position to a destination.

Who is a potential Atlas user?

- People who want to know how to get from the bus stop to a business meeting 8 blocks away by exploring it first on Atlas and brailleing the directions to bring along.
- Mobility instructors who want to review a route before teaching it to a student.
- Mobility students who want to review a route in the comfort and safety of his or her home or office before going out to walk it with a dog or cane.
- Blind travelers who want to explore and understand the streets around the hotel in an unfamiliar city or to learn the route to a nearby restaurant.
- Finding a missing zip code. Atlas can tell you the zip code at almost any location.
- Agencies or libraries serving blind or visually impaired people that would like to provide access to otherwise inaccessible maps.
- Blind hosts who would like to take their visitors on a sight seeing tour of local points of interest.

Is Atlas a Game or a Tool?

Atlas is a lot more fun than most programs but it is also a very serious orientation tool. Good orientation and mobility greatly enhance the development of education, career and social opportunities. You can't convince an employer to hire you if you can't demonstrate the ability to get to the work site independently. You will not build an impressive resume of community activity involvement if you restrict your college education to the library, classroom and dorm.

Atlas empowers the blind person by offering the option to be more mobile - to surpass sighted colleagues or family members in independent travel. You can be the leader rather than the follower. As with any powerful tool, you must develop skill in Atlas' use and how to best integrate it into your other orientation and mobility techniques. The full potential of Atlas will be realized when you comfortably use its many

features along with good mental map imaging to understand a familiar area or an unfamiliar area. The poor traveler can become good and the good traveler can become great. Together, you and Atlas create "map literacy". This in turn gives you choices.

Tape Tutorials

Listening to the Internet

An exciting new way to learn about using the Internet is available exclusively from Blazie Engineering. TECSO has developed an interactive tutorial kit designed to assist blind and visually impaired users in learning how to use the Internet. The kit provides the user with a true mental image of the Internet structure as well as its special features.

Listening to the Internet contains a tutorial on CD-ROM- an interactive learning application that uses high quality narration and easy to use single key commands. The kit also contains a companion tactile guide presenting the Internet screens in tactile graphics and Braille, which gives the user a picture of the Internet environment. The users guide is presented in Braille, print and audio formats. The entire Listening to the Internet kit comes in a sturdy binder which contains all materials needed.

Listening to the Internet is specifically designed to be used in conjunction with access technology such as screen readers, re-freshable Braille displays and large print programs. However, special built-in access features allow Listening to the Internet to be used alone. It is a valuable personal instructional tool as well as an indispensable resource to teachers, rehabilitation centers and businesses.

Listening to the Internet actually uses Internet Explorer 4® and higher to guide the user. Students gain "real time: experience which offers these benefits:

- Reduced Learning curve
- Reduced Cost
- High Motivation
- Consistency of Quality Training
- Easy Access
- Success

Listening to the Internet requires the following:

- Windows® 95 or Windows® 98 compatible Computer
- Internet Explorer® 4 or Higher (Internet Explorer® 5 recommended)
- Sound Card

Listening to Windows 98

An exciting new way to learn about using Windows® 98 is available exclusively from Blazie Engineering. TECSO has developed an interactive tutorial kit designed to assist blind and visually impaired users in learning how to use the Windows® 98.

The kit provides the user with a true mental image of the Windows® 98 structure as well as its special features keystrokes. Listening to Windows® 98 contains a tutorial on CD-ROM- an interactive learning application that uses high quality narration and easy to use single key commands. The kit also contains a companion tactile guide presenting the Windows® 98 screens in tactile graphics and Braille, which gives the user a picture of the Windows® environment. The users guide is presented in Braille, print and audio formats. The entire Listening to Windows® 98 kit comes in a sturdy binder which contains all materials needed.

Listening to Windows 98 is specifically designed to be used in conjunction with access technology such as screen readers, re-freshable Braille displays and large print programs. However, special built-in access features allow Listening to Windows® 98 to be used alone. It is a valuable personal instructional tool as well as an indispensable resource to teachers, rehabilitation centers and businesses.

Listening to Windows 98 uses the operating system to guide the user. Students gain "real time" experience which offers these benefits:

Speaking of Windows Second Edition

This very popular 6-tape set begins with the basics of the start menu and dialog boxes and opening and closing programs. It presents more advanced features of Windows such as assigning sounds to events, changing color schemes, creating shortcuts and hot keys, and preventing conflicts with external synthesizers. You'll be taught how to use the keyboard to get around in Windows 95, but you'll learn basic mouse terminology and techniques so you'll know what to do when you run across a less-than-friendly program.

Speaking of Windows Second Edition \$60.00

Speaking of Microsoft Word

If you're a user of Microsoft Word 6 or Word 8 (the version of Word which is included in Office 97), you'll find this 6-tape set essential. "Speaking of Microsoft Word" builds on the general skills you learned in the first half of "Speaking of Windows 95." You'll learn basic word processing concepts and then move to more advanced features of Word such as using mail merge to fill out a pre-printed form and creating and editing footnotes.
